Curve Light 2

Rechargeable high power front light

Rechargeable high power bike light with a brightness of up to 100 lumens and a run-time of up to 35 hours. Easy attach and detach from the handlebar with the elastic silicone band.

On the brightest setting, the light produces 100 lumens for two and a half hours. In the power saving flash mode the light can last up to a lengthy 35 hours. It takes only two hours to charge from flat to full via a convenient USB charging cable, which is included.

The design of the glass, which spills over the sides, ensures a wide range of light, not only in front of the cyclist but also reflects off to the sides. This results in a cyclist peace of mind that the light provides them with clear visibility of the roads as well as being visible to other travelers at 180 degrees around them.

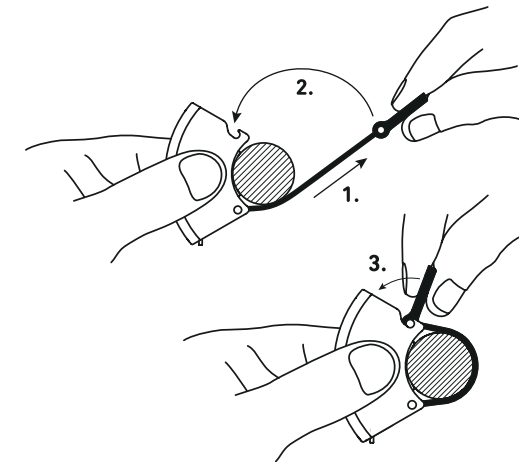

The completely weather resistant light (IP-44) will show you the way through rain, hail or snow.

Fits handlebar diameters from 22 to 42 mm

Charging time
— 2.5 hours from flat

Battery
— 650 mAh

Package contents
— Curve Front Light
— Micro USB cable

MODES	—	— — —	—	— — —

LUMENS	100	100	30	30
RUNTIME	2.5H	12H	7.5H	35H

Rechargeable high power rear light

Curve Rear Light, a bright rear light in a curve design that emits light in a 180 degree angle. It has a maximum brightness of 37 lumens and a run-time of up to 24 hours. Its quick and easy USB recharge ability will keep you from being in the dark.

Curve light easily attaches and detaches from the seat post of any bicycle thanks to its elastic silicone band. A single click turns it on or off, and a double click changes between the five modes of light available.

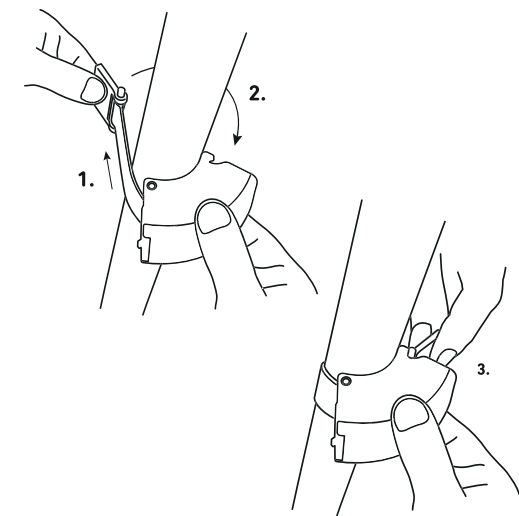

The light is equipped with three LED's, one super bright to make the cyclists visible from far and two bright LED's for comfortable side vision. This ensures that the cyclist can be spotted from far away and it also gives visibility to travelers at 180 degree angle.

It is weather resistant and can withstand rain, hail and snow.

Charging time
— 2 hours from flat

Battery
— 650 mAh

Package contents
— Curve Rear Light
— Micro USB cable

USB Light

Compact, rechargeable city light

The USB Light is compact, lightweight and surprisingly bright. It fits all bicycles and is quick and easy to attach to the handlebar or saddle pole with an elastic rubber band. Its large button on the upper side makes the light easy to turn on and off, even with gloves.

USB Light is fitted with a micro USB port for recharging the battery. All mobile phone chargers with micro USB connection can be used as potential chargers for the USB Light. The indicator on the back of the light will start to flash when the battery is low and even then the light is programmed to hold a constant brightness so you can always trust the lights to be bright when you need them.

The USB Light is weather resistant and can be used all year round.

- Run time

REFLECTORS

Clip-on Reflectors

Wearable magnetic reflectors

Clip-on Reflectors are a convenient and effortless way to add reflection to any item or outerwear. These handy and easy-to-attach reflectors add visibility to any item of clothing you clip them on to, ensuring you will be seen in the dark.

The strong magnetic ends sit firmly through all weather conditions, so you don't have to worry once you've clipped them on. Small enough to leave in your bag when you don't need them, but big enough to keep you safe when you do.

Reflective Stickers

Reflective stickers for bike frames

A fun and smart way to add some extra color and safety to your journey. Being adhesive, they easily attach to any frame, fork or fender and can be peeled off with no harm done. Customise your bike with some sparkling colors and be more visible in traffic.

They don't lose their adhesiveness so you don't need to worry about them letting you down when you most need them. Rain, hail or snow, they've got you covered.

Instructions
 — Clean the surface where you want to mount the sticker.

The stickers can be peeled off from the frame without harming it.
